ADVANCED ELECTRONICS & LOGISTICS LTD

....the complete solution

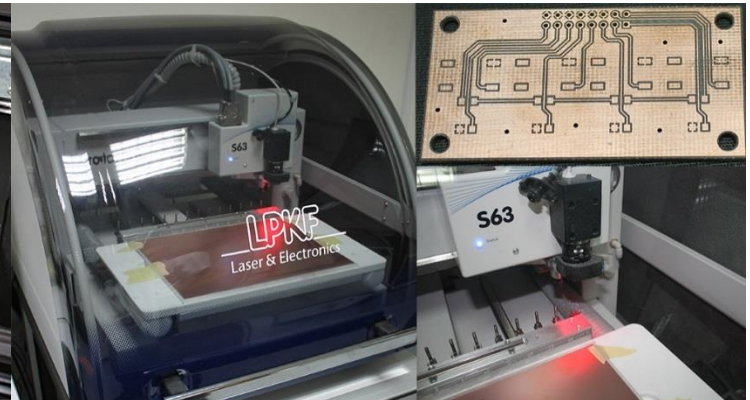

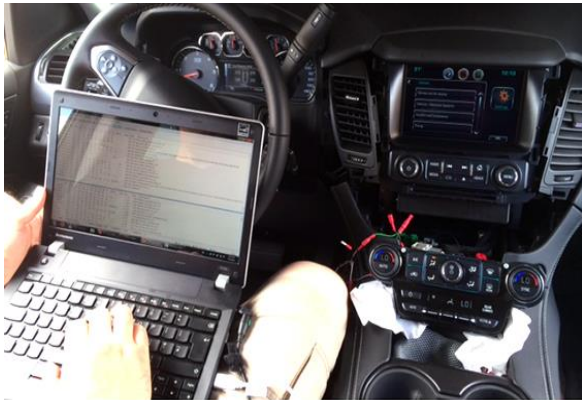

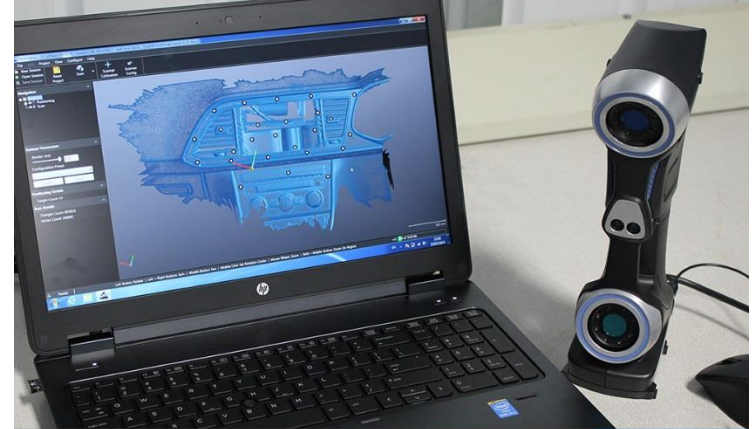

Connects2 - Product Range

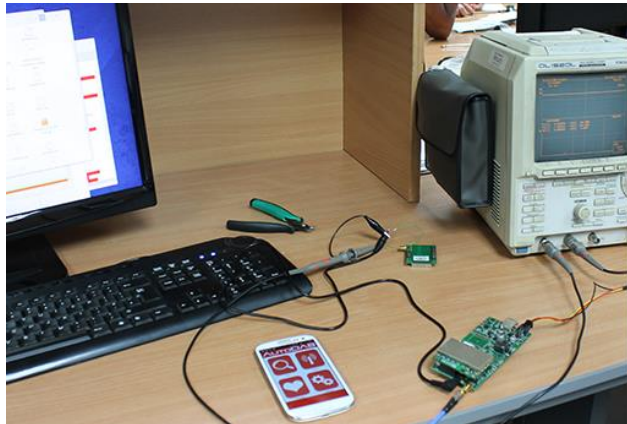

Company Overview – Development

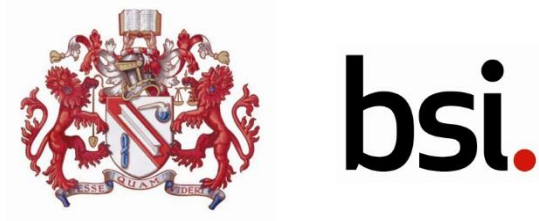

Connects2's biggest advantage over its competitors is its in-house development team. Connects2 employs a dedicated team of experienced, highly qualified software and hardware engineers. Projects can be customer driven or market led and range from a simple interface required to a bespoke product required for the OEM market. All products developed by Connects2 are fully tested on a range of vehicles before being released into the market place.

Company Overview – Development
