

# Working in partnership to make smarter car radios

- Radioplayer - history and context
- Metadata - Worldwide Radioplayer API
- Interface Design - Reference Radio

# ▶ Radioplayer – a deep-rooted collaboration

- Launched in the UK in March 2011
- BBC and Commercial Radio partnership
- Non-profit organisation, owned by Radio
- To grow online listening on web and apps
- Focus on User Experience and Metadata
- *'Share technology, compete on content'*

## ▶▶▶ Now a global platform, focused on in-car listening

- Radioplayer platform now in 9 countries
- Non-profit, broadcaster-owned in each
- 15 more countries in negotiations to join
- EU 'centre of gravity' but widening beyond
- Solving complex technology challenges for Radio

# ▶▶ Metadata: Boring....but essential for smarter radios

- Station name: Short, medium, long
- Description: Short, long
- Geo footprints / zip codes
- Logos in various formats
- Social media handles
- Streams: Low and high bitrate
- DAB bearer information
- FM bearer information
- Podcasts and catchup shows
- Phonetics

# ▶▶ Metadata: Worldwide Radioplayer API

**WRAPI**

OPEN FEED IN AN OPEN RADIO STANDARD

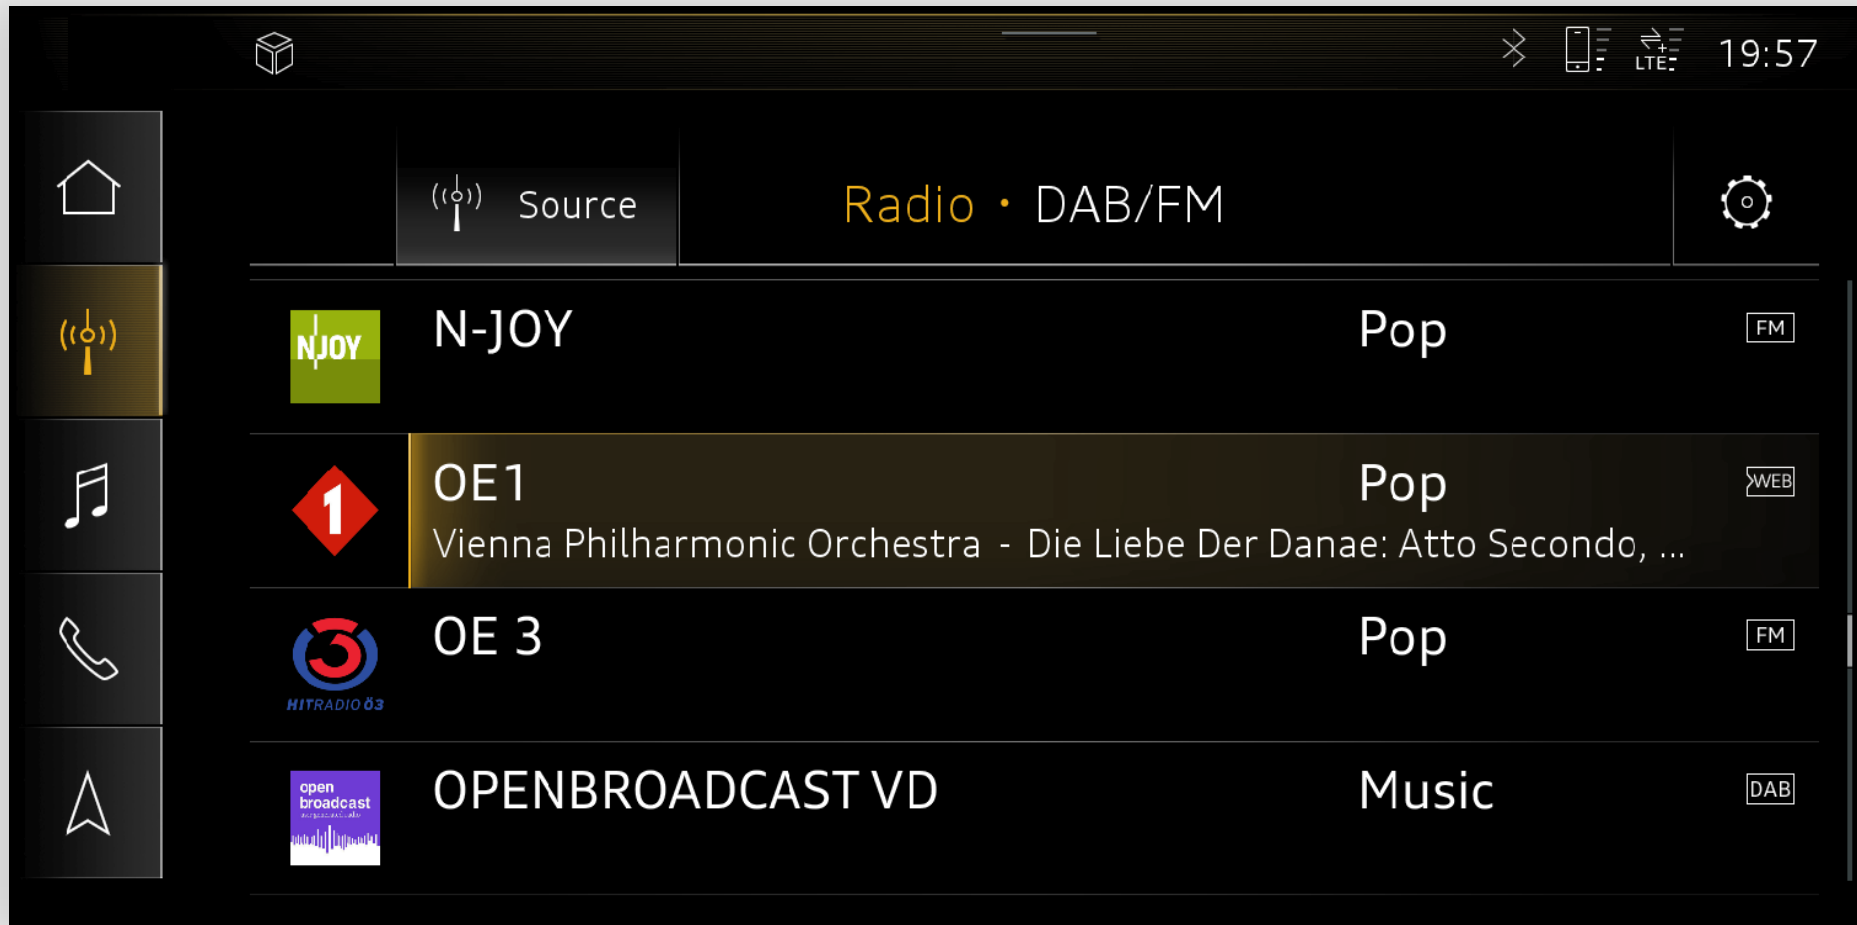

PROTECTED FEED IN AN OPEN WEB STANDARD

FUTURE METADATA STANDARDS AS NEEDED

# ▶ How Audi use WRAPI data in their range

## ▶▶ Worldwide Radioplayer API – partnership principles

- We work with partners who respect radio's place in the car
- The API is free to use, but we may ask for a small setup fee
- Licence conditions are negotiable. Examples include...
  - ▶▶ There should always be a 'Radio' button
  - ▶▶ Navigation should be via A-Z station lists
  - ▶▶ Logos and streams should never be altered
  - ▶▶ There should be no attempt to re-monetise

## ▶▶▶ Reference Radio – combining good design and great data

WorldDAB Auto UX research showed that drivers want....

- ...to find the radio easily in the dashboard
- ...to find radio stations easily
- ...to see an up-to-date list of stations
- ...to be able to set and use pre-sets easily
- ...to keep listening as reception varies
- ...to know more about what's on air
- ...to have their radio set up properly by default
